Field of specialisation:	<ul style="list-style-type: none"> • Very basically, we are dealing with member SMEs operating in various sectors as many chambers of commerce and industry do. • Beside our main activities such as trade registration, we offer our members consultation about exportation and possible trade opportunities with foreign countries through B2B meeting at our chamber. • We conduct researches and studies for the digital transformation of our members. In addition, we support our members in this regard. • We aim to create and support a "regional entrepreneurship ecosystem" by providing an environment (İNOVATSO - https://inovatso.org.tr/) for innovation work not only for our members but also for all initiatives in our province. • We also provide incentives for our members to attend exhibitions at home and abroad.
Expertise offered:	<ul style="list-style-type: none"> • We are planning to apply for a CORNET project that is about a multi-sectoral or horizontal R&D field for the development of digital transformation and digital technologies acceptance models of SMEs. It focuses especially on SMEs that are stakeholders of urban tourism. The purpose of the project is mainly to develop a smart and sustainable urban tourism management model in Antalya. • Also, we always would like to cooperate in different areas.
